Kristi Cooper– Human Sciences Specialist, Iowa State University Family Life Human Sciences Extension & Outreach

Dr. Luke Hansen, PsyD– Outpatient Psychiatry, Mercy Medical Center

“This is the biggest public health discovery we’ve ever seen.” – Laura Porter, Co-Founder, ACE Interface

“RESILIENCE is a fascinating documentary that eloquently explains the health-care issues that confront us directly and indirectly on a daily basis. But more than that, RESILIENCE gives us the solution to this problem. Rarely do you find a documentary that highlights a problem and gives a solution. It’s a film every educator, health-care provider, and lawmaker should see.” - Pamela Powell

“If I had to boil it down for one thing for people to learn from this science, its to totally put to bed for- ever this sense that children who are born under disadvantaged circumstances are doomed to poor life outcomes. The science is saying that’s just not true.” – Dr. Jack Shonkoff, Pediatrician, Director, Center on the Developing Child, Harvard University
